Child Development

Associate in Applied Science Degree (5 semesters)
Certificate (3 semesters)
Short Term Certificate (1 semester)

At a Glance
Completion of the Child Development Program provides students with a specialized quality education with the necessary knowledge and skills to become successful caregivers and administrators in early care and education programs such as family day cares, childcare centers, Head Start, Early Head Start or Pre-K assistants.

Teachers of young children play a vital role in their development. Positive experiences during children’s early years are critical for brain development and can shape their views of themselves and the world. What children learn and experience in the first five years can affect their later success. Preschool teachers use a variety of teaching strategies and materials to teach basic skills and introduce concepts to children in all areas. Teacher assistants provide instructional support for classroom teachers. They may also tutor and assist children.

There will be an increased demand for preschool programs as the population of children ages 3 to 5 is expected to rise. Because children between these ages are typically enrolled in preschool, the demand for preschool teachers increases when this population increases. (U.S. Department of Labor). Child Development courses are all now offered in only an online format. Students may enroll in most of the child development (CHD) courses without being admitted into the program.

Program Description
The Child Development Short-Term Certificate fulfills basic objectives to provide care to children in one of four areas: Infant/Toddler, Preschool/Family Child Care, Child Development, and Early Childhood Education. Courses to earn at least one of the short-term certificates are offered each semester. Students who earn a minimum of nine hours in child development are qualified to obtain teaching positions as assistants in the First Class Pre-K classrooms or many other early care programs.

The Child Development Certificate program offers the student background knowledge of all stages of child growth and development; training and practical experience in conducting all types of learning activities with children; knowledge and application of techniques in positive guidance and discipline, health, safety, and first aid practices, and a basic knowledge of the state minimum standards for day care centers and homes.

The Child Development Associate in Applied Science Degree program is designed to prepare students for employment in preschool programs. Graduates may be employed as teacher assistants in public kindergartens, as teachers or directors in private and preschool programs. Classes in this program are designed to meet the Alabama state minimum standard qualifications for a director, program director, and teacher in a licensed childcare center.

Students can fulfill the 120 hours of professional early childhood education training for the Child Development Associate Credential (CDA) by successfully completing three courses which are CHD 100, CHD 206, and CHD 204 or 209 (infant and toddler only). See below for details.

Admission Requirements
1. Submit a WSCC application declaring Child Development as the major and meet all the general admission requirements of the college. Applications will be accepted August 1st through November 1st for spring semester admission. Applications received after November 1st will be considered on a space available basis.
2. Student must be in good standing with the college.
3. The CHD program online application is located on program’s webpage at www.wallacestate.edu. Online application instructions are under the Application to Program tab. All applicants are required to upload all necessary documentation for consideration.
4. Official transcripts from each college attended must be provided to the Admissions Office and all unofficial transcripts must be uploaded to the program application.
5. ACCUPLACER scores for reading, writing, and math must be uploaded to the program application.
6. Possess a minimum cumulative GPA of 2.0 on a 4.0 scale on all previous high school and college work attempted.
7. Students may apply to the program before completion of the general education courses. It is preferred that students have completed a minimum of three CHD courses with a grade of C or better to apply.
8. Student must meet the essential functions and technical standards required for the program - see Physical Form criteria.
9. Schedule an interview with the Child Development Program Director prior to the semester you wish to enroll.

Selection and Notification
1. The Child Development Program admits annually for the spring semester.
2. Program applications will be reviewed for completion of program admission requirements. Written notification of outcome of each application will be mailed and/or emailed to the address provided on the application.
3. Students selected must respond, confirming acceptance within ten (10) days of the postmarked date of the acceptance letter. A student who fails to respond may forfeit his/her place in the class.

Program Expectations
Students admitted into the Child Development program are expected to comply with the Health Science Program Regulations and Expectations as published in the Academic and Student Regulations section of the Wallace State College Catalog.

Students enrolled in child development courses are required to participate in observations and field experiences to complete activities and assignments with young children for some coursework. Students are expected to be able to fulfill these assignments at the student’s expense and should plan accordingly.

Child Development courses are offered online and utilize Blackboard for communication, information and submission of assignments so students are expected to have access to a computer with a webcam and Internet access and have the necessary skills to complete coursework utilizing word processing and accessing Internet files or websites. CHD 215 requires admission and acceptance to the program. Students may enroll in all other CHD courses without first being admitted into the program.

Child Development program faculty may require all online quizzes or exams to be completed through the use of a webcam and designated browser as described in course syllabi. Any request for transferred credit for CHD courses to the college must be for courses completed within the last five years with a grade of at least a “C” or above.

Upon Admission
1. Students selected for acceptance must attend the mandatory orientation session on campus (offered online for students who live greater than 75 miles from campus).
2. Upon acceptance into Child Development, the student must submit:
   a. signed consent on drug and alcohol testing, background check, and other college policies located in the child development program handbook.
   b. proof of valid CPR certification as Basic Life Support/Health Care Provider.
   c. proof of health insurance. Health insurance coverage is required.
   d. a completed physical examination form (current within one year) on the proper form provided by the Health Science division. Proof of immunizations or immunity must be attached as indicated on the physical form.

Admission to the Child Development program shall be conditional depending upon the student’s ability to pass an initial drug screen and background check. Students may be subjected to random drug testing during the length of the program. Failure to submit all required clinical documentation before the program established deadline will result in program dismissal.

Students cannot begin field observations until copies of the completed physical form, background check, drug screening, CPR certification and health insurance card are on file. The physical form, background check and drug screening must have been completed within the last year at the time of field observations.

Progression
Systematic progression through the program will ensure timely completion of the program. Prior to taking courses, students are advised to meet with the program director to develop a comprehensive plan for satisfying program requirements in a timely manner. Most courses are only offered once per year so it is recommended that students plan ahead to take the courses that are needed. By following the suggested course schedule students will be able to complete the program within five semesters.

Uninterrupted progression is most desirable. If progression is interrupted for more than one semester (excluding summer), the student must apply for readmission to the program. Students who are readmitted must follow all program expectations as listed in the catalog and student handbook.

Students are required to achieve a grade of “C” or above in all general and major required courses. Students who fail to earn a “C” or above will be required to repeat the course. Students are required to maintain a 2.0 GPA while enrolled in the program. If the GPA falls below a 2.0 for more than one semester, the student will be dismissed from the program and must apply for readmission. Students can reapply to the program one time.

Career Path
The Child Development Associate in Applied Science Degree program is designed to prepare students for employment in preschool programs. Emphasis is upon developing competency in guiding the experience of preschool children. Graduates may be employed as teacher assistants or aides in public school systems, as teachers or directors in private and preschool programs and as teacher in Head Start or an assistant in Alabama’s First Class Pre-K. Classes in this program are designed to meet the Alabama state minimum standard qualifications for a director, program director, and teacher in a licensed child care center. Some Child Development courses from WSCC will be accepted for transfer to other four year institutions to obtain a B.S. Degree
in Early Childhood Education. Please consult the STARS transfer guide for the latest information.

The Child Development Certificate is designed as a step between the short-term certificates and the Associate in Applied Science degree in Child Development. Students who earn a certificate in child development are qualified to work as assistants in many early care and education programs including the First Class Pre-K and Head Start classrooms and teach in many other early care and education programs.

The Child Development Short-Term Certificate program offers the student background knowledge of all stages of child growth and development; training and practical experience in conducting all types of learning activities with children; knowledge and application of techniques in positive guidance and discipline, health, safety, and first aid practices, and a basic knowledge of the state minimum standards for day care centers and homes.

Employment of preschool teachers is projected to grow 10 percent from 2016 to 2026, faster than average for all occupations. Growth is expected due to a continued focus on the importance of early childhood education. The median annual wage for preschool teachers was $28,790 in May 2016.

The median wage is the wage at which half the workers in an occupation earned more than that amount and half earned less. (Source: Bureau of Labor Statistics, U.S. Department of Labor, Occupational Outlook Handbook, 2017-18 Edition, Preschool Teachers.)

NOTE: The Guided Pathways Curricular Maps below contain all the elements required for degree/certificate completion. However, courses may be offered or taken in other semesters so long as prerequisites are met. Additional options for elective courses are available. Please see Degreeworks for allowable substitutions. Courses may be available days, nights, hybrid, and online. Sample maps for part-time attendance may also be available. Please see an advisor.

*ORI 110 (Freshman Seminar) is a college requirement, not a requirement of a specific program. You are exempt from Freshman Seminar if you are a transfer student with a minimum of 12 semester hours of college work or if you were enrolled at Wallace State Community College before Fall 2004. ORI 110 is required for incoming freshmen in all divisions.

**Not all CPR courses are acceptable for transfer for EMS 100. Please call Admissions Office for information.

***Requires entry into the CHD Program.

CHILD DEVELOPMENT ASSOCIATE (CDA) CREDENTIAL

REQUIRED COURSES (1-2 semesters)
The courses offered are designed to fulfill partial requirements for the CDA Credential. The CDA is awarded by the Council for Professional Recognition and is not awarded by Wallace State. Additional CDA credential requirements are the student's responsibility. The following courses meet the requirements for 120 clock hours of professional educational training for the CDA:
CHD 100 Intro. to Early Care and Education of Children 3
CHD 204 Methods & Materials for Teaching Young Children or (CHD 209 Infant and Toddler Education Programs for Infant-Toddler credential only) 3
CHD 206 Children’s Health and Safety 3
Total Semester Credit Hours 9

If you are considering the CDA, please check the Council’s website at http://www.cdacouncil.org for additional requirements and information.
For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at http://www.wallacestate.edu/Programs/Health-Division/Child-Development
ASSOCIATE IN SCIENCE DEGREE

GENERAL STUDIES/LIBERAL ARTS

Associate in Science Degree General Studies (A.S.) with Concentration in Child Development (Early Childhood Education)

This sample is recommended for students who wish to pursue a Bachelor’s degree in Early Childhood Education at Athens State. Students should consult the STARS guide for more information. Check with the senior institution to which you plan to transfer.

At a Glance
The Child Development (Early Childhood Education) curriculum is designed for students who wish to prepare for a career in early childhood education. This Sample Curriculum/Map includes courses that will transfer to Athens State to earn a Bachelor’s degree in Early Childhood Education. Students interested in early childhood education should discuss their educational and career goals with an early childhood education advisor as early as possible before choosing coursework.

Program Description
Teachers of young children play a vital role in the development of children. Positive experiences during children’s early years are critical for brain development and can shape their views of themselves and the world. What children learn and experience in the first years can affect their later success or failure in school. Early childhood teachers use a variety of teaching strategies and materials to teach basic skills and introduce concepts to children in all subjects. This General Studies curriculum with an emphasis in Child Development (Early Childhood Education) will help students increase their knowledge of the education of young children as they prepare for a career in early childhood education.

Admission Requirements
Students must have a high school diploma or GED and meet all the general admission requirements ofWSCC.

* Students must complete a 6 hour sequence in either Literature or History. Students must have at least 3 or more semester hours in History and Literature.
**In most cases, only “Code A” courses should be chosen to be considered for transfer. See catalog course descriptions.
*** ORI 110 – Freshman Seminar is a college requirement, not a requirement of the program.

NOTE: The Guided Pathways Curricular Maps below contain all the elements required for degree/certificate completion. However, courses may be offered or taken in other semesters so long as prerequisites are met and courses are available. Additional option available. Please see DegreeWorks for allowable substitutions. Courses may be available days, nights, hybrid, and online. Sample maps for part-time attendance may also be available. Please see an advisor.
