Frequently Asked Questions

PROGRAM INFORMATION:

What is a radiologic technologist?
Is the Diagnostic Imaging program fully accredited?
What is the length of the program?
Where can I obtain information about the program?
What is the timeline for the admission process?

APPLICATION INFORMATION:

What information is required to complete an application?
Am I required to complete observation hours?
Is it necessary to get letters of recommendation in order to increase my chances of being accepted into the program?
Do you require any special entrance exams in order to be admitted into the program?
But I already have a bachelor’s or master’s degree. Do I need to go back and take a basic college entrance exam like the ACT?

GENERAL EDUCATION INFORMATION:

What general required courses do I need to satisfy the Diagnostic Imaging degree plan?
Are there any exceptions to the general education courses?
Can the general required courses be taken at any other college?
Can I still be admitted to the program if I have not completed all of my general education courses?

GPA INFORMATION:

What is the minimum GPA required for program admission?
How do I improve my GPA?

GENERAL INFORMATION:

How many students apply to the program and how many are accepted each year?
Are CPR certifications, physical exams, background checks, drug testing or any other medical testing required in order to complete an application?

Am I required to have Health Insurance?

If accepted into the DI program, what type of class schedule can I expect in a typical week?

**CLINICAL INFORMATION:**

When does clinical education begin and where does it take place?

Will I be able to choose where I go for clinical?

**HELPFUL INFORMATION:**

Will I be able to find a job after completing the DI program?

Do I need to meet with a DI program advisor at WSCC?
Frequently Asked Questions

PROGRAM INFORMATION:

What is a radiologic technologist?
Radiologic technologists are the medical personnel who perform diagnostic imaging examinations and administer radiation therapy treatments. They are educated in anatomy, patient positioning, examination techniques, equipment protocols, radiation safety, radiation protection and basic patient care. They may specialize in a specific imaging technique, such as bone densitometry, cardiovascular-interventional radiography, computed tomography (CT), mammography, magnetic resonance imaging (MRI), nuclear medicine, quality management, sonography, or general radiography. The radiologic technologists who specialize in radiation therapy, which is the delivery of high doses of radiation to treat cancer and other diseases, are radiation therapists and medical dosimetrist.

Is the Diagnostic Imaging program fully accredited?
Yes. The program is fully accredited by the Joint Review Commission on Education in Radiologic Technology (JRCERT). Information about accreditation can be obtained by visiting the JRCERT website at www.jrcert.org. The JRCERT is the only agency recognized by the United States Department of Education for the accreditation of traditional and distance delivery educational programs in radiography, radiation therapy, magnetic resonance, and medical dosimetry. Accreditation of an educational program provides students, as graduates, assurance that the educational program will provide them with the requisite knowledge, skills, and values to competently perform the range of professional responsibilities expected by potential employers nationwide. It also assures they will be eligible to take the national certification examination at the completion of the program.

What is the length of the program?
It takes 5 consecutive semesters (21 months) to complete the DI program. If progression is interrupted, it should be noted that the program must be completed within 33 months from initial admission.

Where can I obtain information about the program?
A Health Program advisor is available in the ACTION (advising) Center at 256-352-8040. For general program information, contact Debra Young at 256-352-8334. Students may also call 256-352-8309 or 256-352-8315 to speak with a DI advisor Monday through Friday from 7:45 – 3:15.

APPLICATION INFORMATION:

What information is required to complete an application?
Submit to the Admissions Office:
- WSCC application or re-entry form
- Official transcripts from all colleges previously attended
- Proof of high school graduation (transcripts) or GED certificate
Appropriate ACT test scores and/or Compass test scores
Any other documents required by admissions

Submit a COMPLETE program application packet to the Diagnostic Imaging Program Director:
- Program application
- Attach documented ACT minimum composite score of 18
- Attach completed Essential Functions form
- Attach Diagnostic Imaging Ranking Form
- Attach ALL unofficial college transcripts
- Attach proof of age (copy of birth certificate only), 18 by August 15 (Alabama Regulations For Control of Radiation Rule 420-3-03(6), “Occupational Radiation Dose Limits”, states that all occupational worker employing ionizing radiation must be at least 18 years of age).

Am I required to complete observation hours?
No. It is suggested that students take the time to observe the day-to-day requirements of a radiologic technologist. Obtaining observation hours is not considered in the ranking process.

Is it necessary to get letters of recommendation in order to increase my chances of being accepted into the program?
No. Letters of recommendation are not required and will not increase anyone’s chances of being accepted into the program.

Do you require any special entrance exams in order to be admitted into the program?
Yes. A minimum composite of 18 on the ACT is required in order for a student to be qualified for acceptance into the DI program, regardless of previous education or experiences. Individuals who have completed higher degrees are not exempt from this expectation. The ACT is one of the three factors considered for admission, thus the higher the score the better your chances of being admitted. Generally, ACT scores improve after college level work, especially math and science courses. If you are planning to retake the ACT, you might consider the ACT Residual Exam offered by WSCC. This exam is the same as the national exam but is offered on-campus, allowing for a quicker release of scores. However, a residual ACT score will not transfer to another institution. This requirement may change without prior notice. Please check the website frequently for any changes.

But I already have a bachelor’s or master’s degree. Do I need to go back and take a basic college entrance exam like the ACT?
Yes. The ACT is one of three scores that are considered for program admission. Without an ACT score your application will not be considered. However, the good news is that if you already have a degree (or even taken your general required courses) you should be “over” prepared for the ACT.

GENERAL EDUCATION INFORMATION:

What general required courses do I need to satisfy the Diagnostic Imaging degree plan?
Applicants must have a “C” or better in all general education courses. Orientation 101 (a WSCC requirement. You are exempt from ORI if you transfer at least 12 credit hours from another institution), English 101 – English Comp I, English 102 – English Comp II or Speech 106/107, Humanities/Art elective (Literature, Area/Ethnic studies, Art, Foreign Languages, Music, Philosophy, Ethics, Religious Studies, and Theatre will satisfy this elective - the DI program recommends PHL 210 ethics and the Health Sciences), Psychology 200 – General Psychology, Biology 201 and 202 – Human Anatomy and Physiology I & II (BIO 103 is a prerequisite at WSCC), and Math 100 – Intermediate College Algebra.

Are there any exceptions to the general education courses?
Students who transfer in at least 12 credit hours from another regionally accredited institution are exempt from the Orientation (ORI) requirement. Although WSCC requires BIO 103 as a prerequisite to BIO 201 and 202, other institutions may not have this same requirement. If you are attending one of those institutions and plan to transfer in both BIO 201 and 202, the DI program does not expect nor require you to complete BIO 103.

Can the general required courses be taken at any other college?
Yes. Wallace State Community College in Hanceville has linkage programs with many other colleges in the state. This linkage relationship guarantees the transfer of certain specified courses. Even if your college is not part of our linkage program or may be out of state, courses are still transferable as long as they are equivalent to our courses. Information on course equivalency may be obtained by contacting the Admissions office at 256-352-8128. A course description from your catalog may be required.

Can I still be admitted to the program if I have not completed all of my general education courses?
Yes. Students must simply meet the DI program admission requirements. However, students who take the general education courses prior to applying to the program will receive points which may increase their chance of being accepted in a competitive admission pool. (You should note in the admission requirements that students required to complete remedial courses in math, English or reading must complete those requirements before they will be eligible to apply.)

GPA INFORMATION:

What is the minimum GPA required for program admission?
A minimum 2.5 cumulative GPA for all previous college work is required. Keep in mind this is a minimal requirement – currently those being admitted have a significantly higher average GPA than this score. Please see the program statistics link for additional details.

How do I improve my GPA?
Although a minimum 2.5 cumulative GPA is required for admission, the DI program uses only the highest grade achieved from the general required courses for ranking purposes. Because of the highly competitive nature of the DI application process, your chance of being admitted into the program can be improved by retaking any course in which you achieved less than an “A”. Every general required course in which you score an “A” puts you that much closer to the highest possible score in this category.

GENERAL INFORMATION:

How many students apply to the program and how many are accepted each year?
The number of applications submitted varies from year to year. For example, in 2011 more than 190 individuals submitted applications to the DI program, of which only 42 were accepted. The program generally accepts 40-45 students each fall. There is not a waiting list and every qualified applicant is considered. Applications are not returned nor is any information released from application packets.

Are CPR certifications, physical exams, background checks, drug testing or any other medical testing required in order to complete an application?
No. The required physical exam, drug testing, background checks, drug testing, CPR certification are completed after beginning the program so that each will be current and valid throughout the clinical rotations. Do not complete any of the items until formally accepted into the program and instructed to do so by the program director.

Am I required to have health insurance?
Yes. Each student is required to have health insurance. This is a requirement of both WSCC and our clinical agencies. Proof of insurance must be submitted to the Program Director prior to the clinical rotation which begins the first semester.
If accepted into the DI program, what type of class schedule can I expect in a typical week?
A DI student should prepare for classes/clinic to meet 3 to 4 days a week throughout the entire program. The DI program is not a part-time program and requires an intensive amount of studying when not in class. During the first semester, students can expect to attend class 2 to 3 days a week from (typically 8:30 – 3:00) with a clinical rotation on Friday (typically 7:00-3:30). Second semester classes will meet 2 to 3 days a week (typically 8:30 – 3:00) with a Thursday and Friday clinical rotation (typically 7:00-3:30). During the third, fourth, and fifth semesters, students will attend clinical on Monday, Tuesday, and Wednesday (typically 7:00-3:30) and class on Thursday (typically 8:30-3:00).

CLINICAL INFORMATION:

When does clinical education begin and where does it take place?
Clinical rotations begin the first semester. Students can expect to rotate through hospitals and specialty clinics. The program has a clinical network ranging from Birmingham, Cullman, Decatur, Huntsville, The Shoals, Walker County, Fayette, and Arab/Boaz. All clinical travel expenses are the responsibility of the student.

Will I be able to choose where I go for clinical?
No. The clinical coordinator will assign each student to a clinical site based on educational need and availability. Efforts will be made to meet reasonable requests regarding having to travel great distances from their homes, but students may be scheduled at any clinical site. Variety in clinical experiences strengthens the students’ skills and for that reason, students need to travel to different clinical sites.

HELPFUL INFORMATION:

Will I be able to find a job after completing the DI program?
Upon graduation, the student is eligible to apply to take the registry examination of the American Registry of Radiologic Technologists (ARRT). Following successful completion of the exam, a registered radiologic technologist will find jobs nationwide. Naturally, employment opportunities fluctuate within geographic regions and practice locations. A new graduate can expect a starting salary of $30,000 to $50,000 annually.

Do I need to meet with a DI program advisor at WSCC?
Advisors are happy to provide program information and individualized recommendations to help you successfully pursue your goal of becoming a radiologic technologist. It is strongly recommended that you correspond with a WSCC program advisor at least once before making application for admission. Having a copy of your transcripts will help the advisor provide the most accurate information.
