

Clinical Observation Alternative Assignment

Each applicant that is unable to complete the *Clinical Observation Hours* required for the DMS Program application due to the COVID 19 pandemic should complete the following assignment.

Applicant must submit the completed assignment along with other DMS application documents no later than **June 1, 2021**. Each question should be 200-300 words in length, double-spaced, 12 font, and should imply that the student has adequately researched the topic and is knowledgeable of the field of sonography.

- 1. What are some of the differences in the sonography specialties (general, vascular, cardiac)?**
- 2. What are important attributes that you think are required to work in the health care field, and why?**
- 3. Discuss various ways that sonographers contribute to patient care other than producing images.**
- 4. What are the expected responsibilities of an entry-level sonographer?**
- 5. Where do sonographers work and what are the various shifts that entry-level sonographers should expect to work?**
