

Prior Learning Assessment (PLA) Request to Review Form

The Alabama Community College System recognizes that learning occurs in a variety of ways. Individuals can develop mastery of course competencies through employment, training, and other experiences. Credit can be awarded for prior learning from which the skills that comprise courses (terminal objectives) are mastered to an acceptable degree of proficiency and the individual documents mastery. In accordance with SBP 706.01, students may apply for this type of non-traditional credit via this application and supporting portfolio. Portfolio should include: detailed summary of experiences that are applicable to college-level learning, work history, specialized training, licenses, certificates, CE units, employer records and/or other materials that support competency.
